MISTAKES**

INTERPRO
SOLUTIONS

InterPro Solutions products and services empower Maximo users to be more effective and successful at their jobs. Simplify processes, save time and money, and increase satisfaction on the front lines of work and throughout your organization.

EZMAXMOBILE

A team that can respond in real time, reduce costly mistakes, eliminate paperwork, and solve problems more effectively can have a profound effect on your entire organization.

But simply putting tablets in people's hands isn't a guarantee of success. Every screen has to be clear and every function has to perform seamlessly within your requirements and processes.

EZMaxMobile™ is built around the way people actually work, with plug and play installation, intuitive interfaces, bold graphics, and clear functionality. That means even the least technical member of your team will become a Maximo expert.

We look at business processes first

Our first step is always to learn as much as we can about your day-to-day requirements and your vision for the future.

How are you currently using IBM® Maximo®? What do you hope to accomplish by going mobile? What are your most critical pain points and bottlenecks? Where are the opportunities for improvement? With EZMaxMobile, you can empower your team while still following all of your Maximo business rules and workflows.

InterPro's support for our rapid mobile expansion has been incredible. With what we have implemented so far, we expect the return on investment to be well beyond our initial estimates.

KEY FEATURES

All EZMaxMobile features are located within one application so there's no need for multiple apps for different functions or processes. Any Apple, Android, or Windows mobile device can interact with Maximo in both real-time and offline modes.

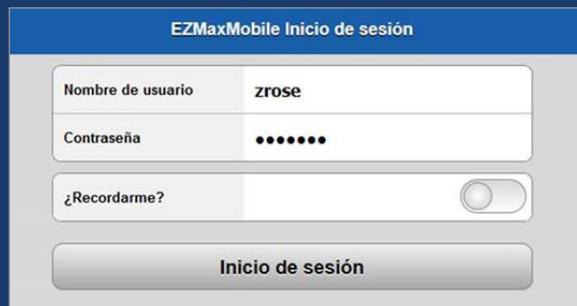

MAPPING

With EZMaxMobile's ability to easily capture GPS data you can record longitude and latitude coordinates for a work order, asset, or location and automatically store the associated GPS data in your Maximo system. Then view these attributes using the "work map" functionality.

BARCODE SCANNING

Gain quick access to records in Maximo such as work orders, assets, locations, and inventory items. You can use mobile-device cameras or external Bluetooth enabled barcode scanners for increased flexibility.

LOCALIZED

EZMaxMobile facilitates true global asset management, including all locales and languages supported by Maximo.

PUSH NOTIFICATIONS

Instant in-app communication has never been easier. Send automated notifications, or speak directly to technicians about critical work order questions.

Since we began using EZMaxMobile, we've eliminated paper work orders, decreased response time, and increased data quality with real-time work order management.

PHOTOS

Increase your team's efficiency by visually communicating issues. A photo taken on a mobile device can be automatically uploaded into Maximo's linked documents and directly associated with a work order, asset, location, or inventory item as an attachment. Technicians can also annotate photos to include critical information and provide greater clarity.

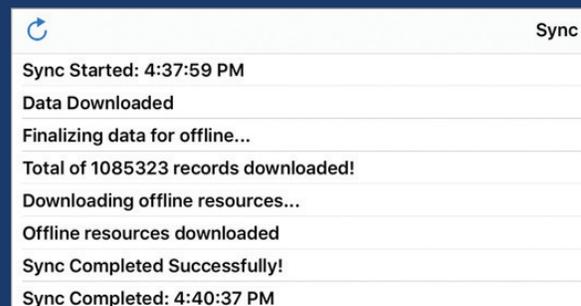

SIGNATURE

Create an electronic signature in Maximo? It's not supposed to be possible without third party software. We overcame this limitation by creating an image with a mobile device and using the storage and retrieval capabilities of Maximo.

VOICE TO TEXT

Have you ever had a long work note to write, but dreaded using the mobile device's tiny virtual keypad? With voice to text functionality, simply speak directly to your mobile device.

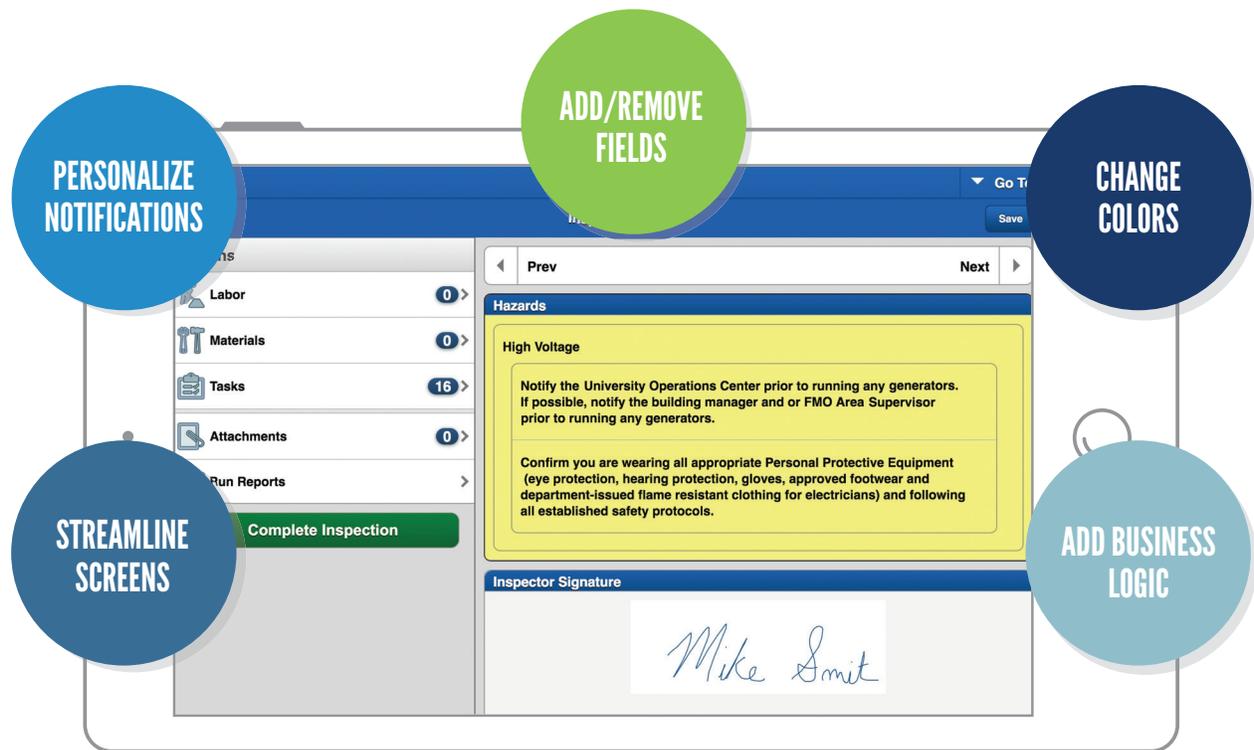

DATA SYNC

Unprecedented sync speed means you'll spend less time waiting and more time working. EZMaxMobile technology creates the fastest record retrieval in the industry, with the ability to sync over 1 million records in less than three minutes.

MAKE IT YOUR OWN

EZMaxMobile is ready to go right out of the box, and is the only fully functional Maximo mobile solution that can be installed on your server in under 30 minutes. It is also highly flexible so you can easily configure your screens to conform to your specific processes, workflows, and requirements.

REQUEST A DEMO

Let's talk about how EZMaxMobile can transform the way you work. Give us a call at **781.213.1166** or contact us at sales@interprosoft.com.

We have not found a more cost-effective, easy to install, easy to use option than EZMaxMobile. The online/offline mode is an added benefit that we will definitely use.
